

**COLD WEATHER CONCRETE POLICY**  
FOR ALL MASONRY/CONCRETE FOOTERS, FOUNDATIONS, CONCRETE  
SLABS AND FLATWORK

When temperatures will be 32 degrees or lower within 24 hours after or at the time of materials placement, masonry/concrete must be protected against freezing for a minimum of 72 hours. Minimum protection method(s) are as follows:

Footings: straw, plastic, or thermal blankets (materials should be on site at time of footing inspection)  
Foundations: Thermal blankets only

Masonry/Concrete installations are prohibited if temperature is less than 20 degrees at the time of placement

Temperatures can be verified through this office or the National Weather Service.  
For more information contact this office at [REDACTED]

502-921-2970

IN ACCORDANCE WITH THE ABOVE POLICY, NO FOUNDATION  
INSPECTIONS WILL BE PERFORMED UNTIL 3 DAYS  
AFTER THE DATE OF MATERIAL PLACEMENT

NOTE: Pours outside the parameters of this policy meeting the American Concrete Institute (ACI 306.1-90) will be allowed. Notification must be made to the inspector prior to the inspection and placement of the concrete.

**AT NO TIME WILL CONCRETE BE PLACED ON  
FROZEN GROUND.**
