Storm Water Newsletter

Fall 2019

Land Disturbance permits are \$100.00 per acre (and fraction thereof) of disturbance area. The minimum fee is \$100.00. Shepherdsville requires a fee for engineering review.

<u>Permit Statistics:</u>	2019 (through September)	
	Permits Issued	137
	Inspections Performed	238
	Complaints Investigated	15

Featured Best Management Practice (BMP)- Construction Entrance

A construction is designed to prevent topsoil erosion into the roadways due to rainfall during construction activity and construction traffic from the work site. Entrances are constructed by removing the topsoil, lining the excavation with filter cloth and covering with #2 or #3 stone. Construction entrances must be maintained until final grading and stabilization (sod or seed/straw) of the construction site.
